

About food recalls and enforcement reports

Recalls are an appropriate alternative method for removing or correcting marketed consumer products, their labeling, and/or promotional literature that violate the laws administered by the Food and Drug Administration (FDA). Recalls afford equal consumer protection but generally are more efficient and timely than formal administrative or civil actions, especially when the product has been widely distributed.

Manufacturers and/or distributors may initiate a recall at any time to fulfill their responsibility to protect the public health from products that present a risk of injury or gross deception, or are otherwise defective. Firms may also initiate a recall following notification of a problem by FDA or a state agency, in response to a formal request by FDA, or as ordered by FDA.

Food Recall Search

The list below provides information gathered from certain recalls of FDA-regulated products and Enforcement Reports. Not all recalls have press releases or are posted on this page. See [Additional information about recalls](#) for a more complete listing.

Search results for data prior to 2012 may be incomplete. For more information please read our [terms and conditions](#)

Company Name: Spartan Central Kitchen
Status: Ongoing
Last Updated: May 31, 2015
Product Description: Zuccchini Stir Fry
Reason for Recall:

During an FDA inspection, microbiological swabs were collected and the results found that 21 sub samples in zones 1, 2 & 3 are positive for *Listeria Monocytogenes* (L.M.), *Listeria innocua* (L.I.) or *Listeria seeligeri* (L.S.). The firm is voluntarily recalling all products manufactured from August 20th to September 10th 2012 due to the possible contamination. All products with sell by dates on or before 11-OCT. No illnesses have been reported.
